

HELP YOUR EMPLOYEES STAY HEALTHY

Flu shots available starting September 1

4 reasons to get a flu shot

It's the best defense

Flu vaccines are shown to reduce the risk of needing to visit a doctor for the flu by 40% to 60%.¹

It's safe

Flu shots can't—and won't—give you the flu. Millions of Americans have received them safely over the last 50 years.²

It protects others

Coughing and sneezing spreads germs. By preventing flu symptoms, you'll help prevent the spread of illness to people around you.

It changes every year

The vaccine is updated each year to target the latest form of the flu virus.

3 ways to get a flu shot

Medical center clinic

Visit our medical centers with designated flu clinics—by appointment only.

Pharmacy

Visit pharmacies at certain medical centers without an appointment.

Saturday flu clinics

Visit our Saturday flu clinics, open September 23, September 30, October 7, and October 14.

For more information on getting your flu shot, visit [kp.org/flu](https://www.kp.org/flu) or call our flu hotline at **800-482-4738** (toll free).
