

Vaccine Coverage

Where to go in Maryland, Washington, D.C. and Northern Virginia

With the added risks of COVID-19, it's more important than ever to get your flu shot. To help reduce your risk and protect your loved ones, you can receive the flu vaccine—and other beneficial vaccines—from the following participating pharmacies in Maryland, Washington, D.C. and Northern Virginia. Visit [carefirst.com/serviceareamap](https://www.carefirst.com/serviceareamap) to view our regional vaccine network area.

Participating retail pharmacies¹

- CVS (including those in Target stores)
- Giant Pharmacy
- Rite Aid
- Safeway Pharmacy
- ShopRite Pharmacy
- Walgreens
- Walmart
- Weis Market Pharmacy

Participating retail clinics¹

- CVS Minute Clinic (including those in Target stores)
- Walgreens Healthcare Clinic

Non-participating providers

If your coverage provides for out-of-network benefits, you may also receive a vaccine at a non-participating pharmacy or retail clinic (not listed above). You may be asked to pay the full price of the vaccine at the time of service. To be reimbursed, you will need to submit a medical claim form with an itemized receipt listing the cost of the vaccine and, if applicable, the administration fee. For assistance, please contact member services at the phone number on your member ID card.

Before you get any vaccine, please call ahead to make sure the pharmacy has a supply of the vaccine you need and to check whether a prescription or doctor's order is required.

Vaccine information

In addition to the flu vaccine, the following vaccines are also covered² under your CareFirst benefits. If you have any questions, speak to your doctor before receiving a vaccine, as there may be age and condition restrictions.

COVID-19

The COVID-19 vaccines help protect you from coronavirus and greatly reduce the chance of severe illness, hospitalization and death.

HPV

HPV vaccine is important because it protects against cancers caused by human papillomavirus infection.

Meningococcal

Meningococcal vaccines help protect against four strains of bacteria that cause meningococcal disease including meningitis and septicemia.

MMR

The MMR vaccine protects against measles, mumps and rubella.

Pneumonia

Pneumonia is a serious lung infection that can affect people of all ages.

Shingles

To help prevent shingles, the CDC recommends adults 50 years and older get two doses of Shingrix due to its effectiveness.

Tdap

Tdap is a combination vaccine that protects against three potentially life-threatening bacterial diseases: tetanus, diphtheria and pertussis (whooping cough).

Td

The Td vaccine can protect adolescents and adults from tetanus and diphtheria.
